

# CRYSTALLIZER

## MULTILAYER SYSTEM WITH CRYSTAL EFFECT

The Crystallizer is a texture effect from StardustColors that creates crystal-like patterns with an illusion of depth.

The process is simple and consists of applying a thin coat of black paint over an aluminum background, wiping it off, and then applying a Candy colored varnish.

# CRYSTALLIZER

## MULTILAYER SYSTEM WITH CRYSTAL EFFECT

Available in three sizes at StardustColors. Many combinations are possible by varying the base coat and the Candy coat.
