

# DIAMOND PAINTS

## IRIDESCENT PEARLESCENT PAINT

Diamond shades are formulated on a Candy base to allow for high transparency and maximum light transmission. Their composition also includes silicon mother-of-pearl, which is more reflective and wider, giving a powerful iridescent effect.

# DIAMOND PAINTS

## IRIDESCENT PEARLESCENT PAINT

Diamond paints are pearlescent type paints offering exceptional colors in terms of depth and sparkle.

The 37 shades are solvent-based matte 1K basecoats, available in cans or aerosols.

They can be applied either over a black or white background.
