VARNISHES & MATES FINISHES

MAT, SOFT AND GUM VARNISHES

STARDUST produces the most abrasion, scratch and wash resistant matt coatings. The VARIANCE range includes a series of 2K matte coatings with gloss levels ranging from 2° to 60°. The **ST822 X** version is an extreme anti-scratch matt varnish.

Special matte effects : The **SOFT TOUCH ST833** is a transparent tintable finish, which produces a surprisingly silky, velvet-like and anti-scratch effect. This SOFT TOUCH varnish is also available in a solvent-free 2K hydro acrylic version.

The **BLACKEST BLACK** finish is a 2K paint with a deep black effect and ultra matte.

GUM ST832 is a variation of SOFT varnish, which has a rubber-like feel to it. It is a very durable varnish that allows scratches to self-resorb.
