

METAL FLAKES

POLYESTER FLAKES FOR BODYWORK AND DECORATION

Our «Metal Flakes» are made of ultra-thin Polyester, coated with a layer of shiny metal, which makes them both ultra-resistant and ultra-shiny. They are resistant to UVs, solvents and water.

METAL FLAKES

POLYESTER FLAKES FOR BODYWORK AND DECORATION

Our hexagonal «Metal Flakes» are produced with **maximum precision cutting**. They are available in 4 sizes : 0.05mm*, 0.2mm, 0.4mm*, 0.6mm* (Thickness: 12 to 25µm).

*** Only some references**

Their great thickness and shape cause an overlap when it comes down on the surface, which produces **a glitter in different directions**.

Often a candy color (clear colored varnish) is applied over the silver flakes. This colors the flakes and gives **a beautiful visual effect of depth**.

Metal flakes are easily applied with a body spray gun or a flakebuster (dry).

Average consumption: **80g per m²**

Dosage : **90-150g per Litre of binder or diluted varnish**

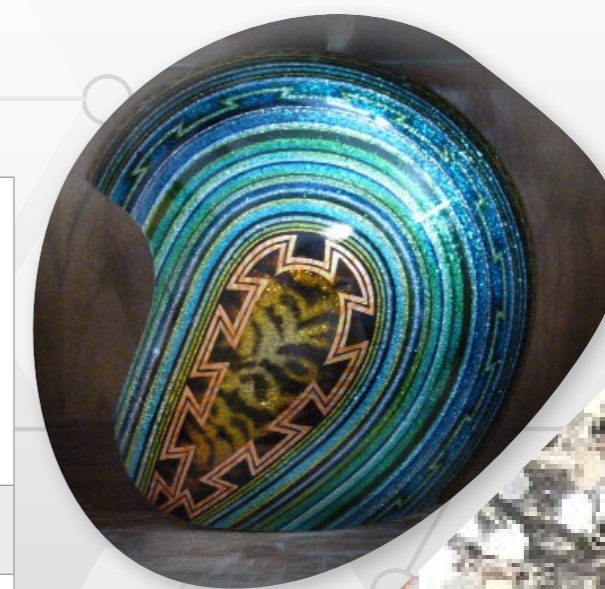

AVAILABLE IN :

- CAN 30G
- CAN 125G
- CAN 1KG
- CAN 25KG

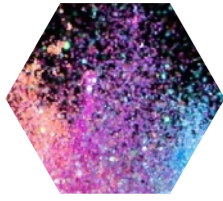

STARDUST DISTRIBUTOR OF 4 RANGES :
