

PHOSPHORESCENT PAINT

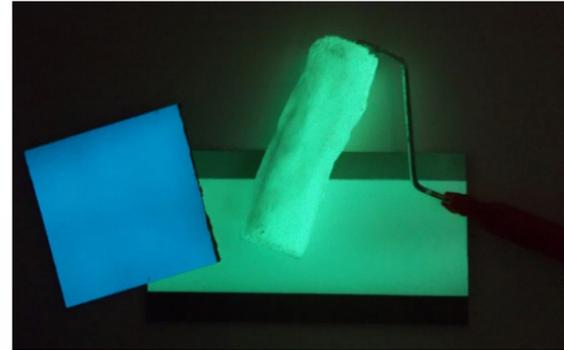

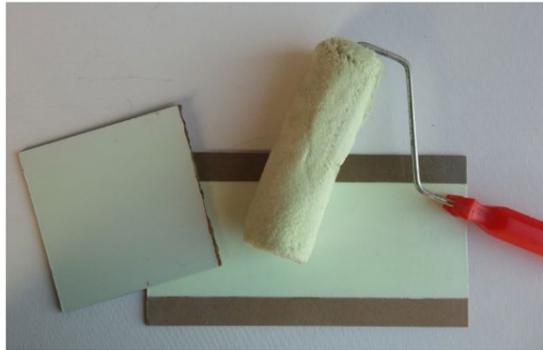

STARDUST IS EUROPE'S LEADING MANUFACTURER OF PHOTOLUMINESCENT PAINTS
BASED ON STRONTIUM AND EUROPIUM ALUMINATE

CREATIVE HOBBY PHOSPHORESCENT PAINT

DECORATIVE CONSUMER PAINT, IN CANS OR SPRAYS

During the day phosphorescent paints are colorless and store light. They then glow in the dark for several hours. Phosphorescent paints are odorless and harmless.

With a thick version, the Moonglo® series and the AEROIK series, a fluid and flexible range for sprayguns and airbrushes.

The water-based acrylic versions are available in 4 colors : **Green, Turquoise, Blue and Purple..**

AVAILABLE AS :

SOLVENT-BASED SPRAY PAINT 400ML
AEROSOL 400ML

available in 8 Colors

PROFESSIONAL PHOTOLUMINESCENT PAINT

FLOOR AND WALL PH90000 EPOXY / PHU2K POLYURETHANE PAINTS

Stardust manufactures photoluminescent paints for safety and marking.

Effective in dark environments, these paints emit a luminescent green color up to 12 hours after

activation, and allow marking and guidance towards emergency exits. Complete loading is done very quickly with all types of lights.

CAN 1,5L
CAN 7,5L

COLORS :

GREEN
TURQUOISE

PHOSPHORESCENT PAINT FOR BODYWORK

NIGHTGLOW PAINTS

« 1K Basecoat », solvent-based or water-thinnable. Phosphorescent paints absorb the energy of the light, and re-emit it in the dark during periods of remanence of 2 to 8 hours depending on the colors.

To obtain an intense phosphorescence, it is necessary to privilege «strong» colors such as green and turquoise, and to apply an important number of coats.

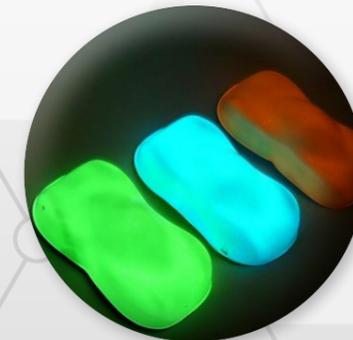

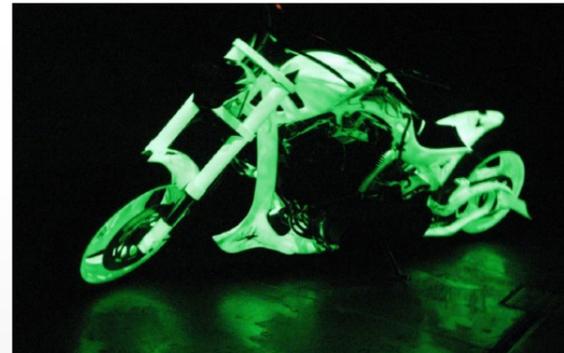

AVAILABLE AS :

- AEROSOL 400ML
- CAN 250ML
- CAN 1L
- LATA 5L

COLORS :

- GREEN , TURQUOISE,
- BLUE , PURPLE, WHITE,
- YELLOW, ORANGE,
- RED
