SPARKLE

AIRBRUSH SOLVENT PAINTS

The SPARKLE series of paints are ultra fine solvent-based paints for airbrushes.

They produce iridescent metallic or pearlescent effects.

Use and supports: They are suitable for all types of supports and must be applied with thin and repeated coats, either over a white or a black background (refer to the table).

They must then be varnished to reveal their full effect.

Composition: ready to use solvent-based 1K basecoats (One component paints).

Rutile green White Color shift blue green Black Teal blue Black Blue lagoon White

Golden green White Goldish mint White Color shift green orange Black Yellow sparkle White

GRAPHIC and SPARKLE airbrush paints show outstanding qualities of smoothness, adhesion and drying.

They are the most reliable paint choice for all body decorating artists.
