PATINA, THEN DRYING  
FOR 15 MINUTES

3  
OPENING

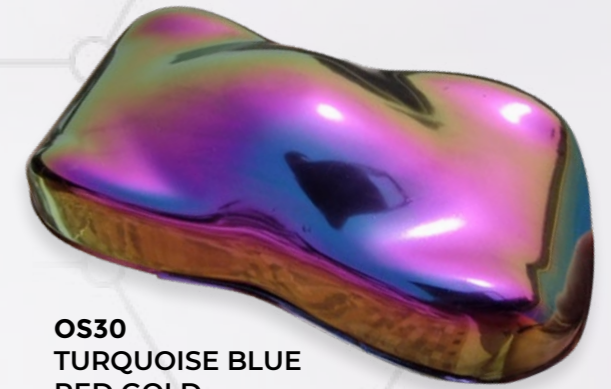

## OIL EFFECT PATINA COLOR CHANGE EFFECT WITH MIRROR FINISH

The Oil Slick effect patina is a decorative surface treatment to be carried out manually by dabbing and polishing on the prepared surface. The visual effect obtained is a sparkling mirror surface, with changing colors depending

on the point of view. The finish obtained with the Oil Slick patina resembles a mirror effect chrome chameleon paint. Oil slick is an exclusive StardustColors specialty.
