

CHROME EFFECTS

MIRROR EFFECT PAINTS

STARDUST offers 3 solutions to achieve chrome effects. They are different systems applicable by spraying or even by brush.

Chrome mirror paint : professional spray paint for bodywork and decoration. 80% chrome effect

Go Chrome paint : easy decorative paint for all publics. 90% chrome effect

Silver plating : chemical silver plating, sprayable system.

Chrome effect 100%

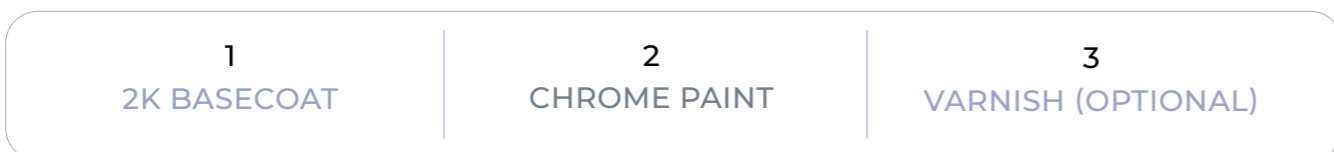

CHROME MIRROR PAINT

PROFESSIONAL CHROME SPRAY PAINT

The chrome paint produces a silver mirror effect when applied over a shiny and hard background.

The chrome paint system consists of 3 steps :

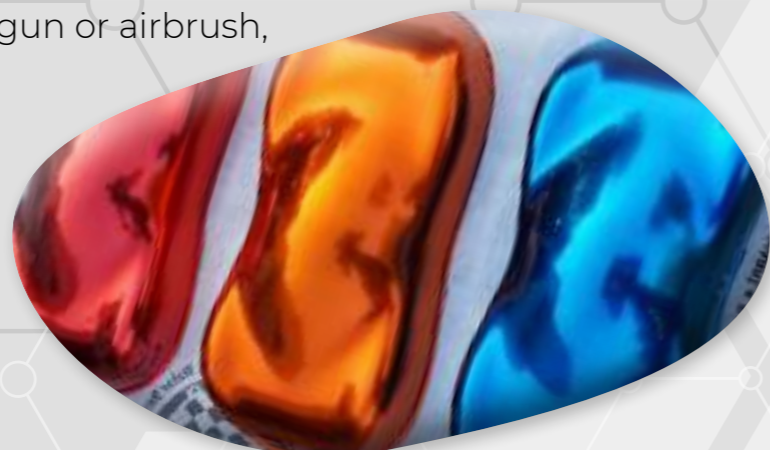

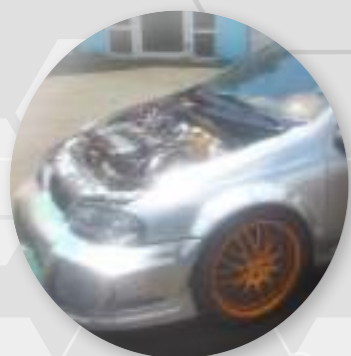

Without varnish

With varnish

The chrome effect is produced by the total evaporation of the paint and the constitution of a **3 µm thick** aluminum-based film.

The application is done with a spray gun or airbrush, with nozzles from **0.15 to 1.4 mm**.

Can be varnished with all types of varnish using a special technique.

Use our ceramic varnish as undercoat and finish. Ready to use mono-component paint based on alcohol.

Non-toxic, flammable product.

- AVAILABLE IN :**
- AEROSOL 400ML
 - CAN 250ML
 - CAN 500ML
 - CAN 1L
 - CAN 5L

GO CHROME

SINGLE-COAT MIRROR CHROME EFFECT PAINT FOR ALL SURFACES. BRUSH OR SPRAY.

GO Chrome is an easy to apply one coat chrome paint.

GO Chrome is a decorative effect that creates an **instant mirror**, without any preparation, on any surface.

It is a **unique and innovative** liquid chrome paint that creates a «**floating mirror**» of clear and brilliant color, by brush, spray, dipped airbrush, or with liners.

VERSIONS AVAILABLE :

CAN 125ML - 500ML - 1L - 5L
SPRAY 400ML

YIELD :

1L= 6-8 M²

It is non-hazardous and has little odor.

No glossy base is required.

It is suitable for decoration or chrome plating of headlight lenses : **the product can be used for headlight lenses.**

It has a powerful **retro-reflective** (effect (light reflection)). It is a decorative paint, **not resistant and not varnishable.**

SILVER

METALLIZATION PROCESS TO OBTAIN THE CHROME EFFECT

Silvering is an ancient process of depositing a layer of mirror silver, by a chemical process of reducing silver nitrate.

Application is by spraying on a hard, shiny base.

The silvering can be varnished, and produces a 100% chrome effect.

StardustColors distributes Jet Metal products (formula R5 and R2 S)

Products offered in complete kits of 25 m² or 50 m².

COLORED CHROME EFFECTS

PROFESSIONAL CHROME SPRAY PAINT

By using Candy® transparent concentrated inks it is possible to tint chrome effects, metals, and real chromes.

Tinted varnishes can be applied to both **chrome paint** and **silver plating**, two systems offered by STARDUSTCOLORS.
