

# RUST EFFECT

## RUST FX PAINT – THE TRUE-TO-LIFE RUST EFFECT

Rust Fx paint allows to obtain a rust effect finish in record time.

The aspect is matt, grey, like steel with orange and grey shades. It is not an imitation effect, but a real oxidized metallic layer.

This lacquer is a hard and resistant finish, extremely durable. It has a natural surface patina but does not degrade like a metal.

This paint system consists of a two-component paint, with its hardener, and also an activator. This activator allows a fast oxidation of the surface of the finish.

**APPLICATION :**  
Decoration, Art

**AVAILABLE AS :**

KIT 2.175 L,

KIT 11 L
