

CHAMELEON INTERFERENCE RANGE

PEARLESCENT PAINTS CAMELEON INTERFERENCE RANGE

The chameleon paints of the 205 to 225 series (Crystal or Diamond type) are transparent: They can be applied to any type of background to obtain multi-coloured opalescent effects. Countless combinations are possible.

Black background

Black background

Gray background

White background

Red background

- 205: Violet Rose Gold Chameleon (D: Diamond Version)
- 215: Cyan-Red Chameleon (D: Diamond Version)
- 217: Turquoise-Purple Chameleon (D: Diamond Version)
- 225: Blue Green Gold Chameleon (D: Diamond Version)

Note : The darker the background, the more the interfering color is visible. The colored reflection is visible under a light source while it is invisible in the shade, without modifying the background color. Products shown on different backgrounds: black, grey, white and red (225)

IRIDESCENT RANGE

PEARLESCENT PAINTS IRIDESCENT FLUO RANGE

The series of iridescent effect paints are achievable in 2 layers: A fluorescent background then a transparent **Diamond Interference interlayer**. Many combinations are possible.
